

Kit contents:

2 x Pairs of bracket moldings.
2 x Strap kits

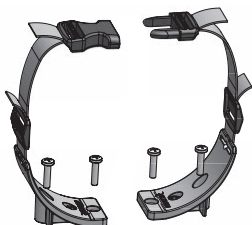

500mm TracPort extrusion with end caps and 4 x track nuts.

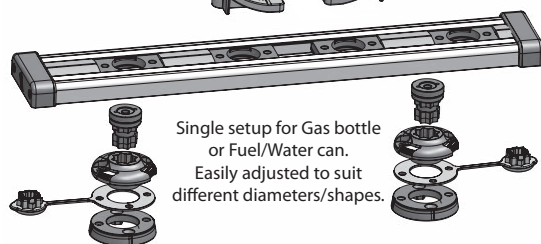

Double bottle setup.
Can be adjusted for different sized dive bottles. Once spaces for StarPorts has been decided, drill holes in TracPort to mount StarPort Adaptors - or fasten TracPort directly to surface.

NOTE:
Longer tracks are also available on our website allowing for expansion or you can just join multiple tracks together.

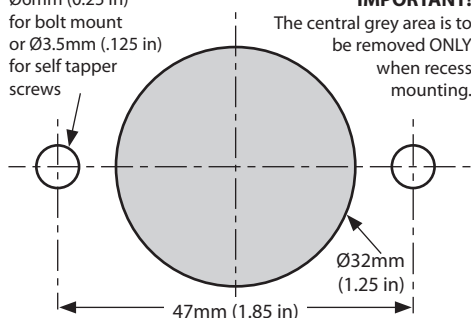

NOTE:
TracPort extrusion must be mounted above half way on the bottle

Single setup for Gas bottle or Fuel/Water can.
Easily adjusted to suit different diameters/shapes.

StarPort™ MOUNTING TEMPLATE

Ø6mm (0.25 in)
for bolt mount
or Ø3.5mm (.125 in)
for self taper
screws

IMPORTANT!

The central grey area is to be removed ONLY when recess mounting.

Note:

Please do not use Petroleum based lubricants on the StarPort slide.
Silicone based products are best suited.
(Please check can contents before using).
